453.2 – Student Immunizations

The School District of Green Lake will follow the Wisconsin School Immunization Requirement Guidelines. As specified in state law, all students must be properly immunized against certain communicable diseases. The parent, guardian or adult student must provide evidence of immunization status or immunization waiver to school officials upon school enrollment. A student may be waived from immunization requirements for reason of health, religion, or personal conviction.

The State of Wisconsin requires year round tracking and recording of student immunizations.
